

Handd,

generating an execution instruction which is effective at said television or video receiver to communicate a portion of one message from one of said processor and said digital switch;

organizing said cadence information, said at least one message element, and said execution instruction in a sequence; and

communicating said cadence information, said at least one message element, and said execution instruction to said transmitter in a sequence before said specific time.

II. REMARKS

A. Newly added claims

In consonance with the agreement between Applicants and the Office regarding the co-pending U.S. patent applications related to this application, Applicants hereby join following claims from their related applications into the instant application, corresponding to the new claim numbers in the instant application.

Application Serial No(s). (Docket No.)	Claims	Corresponding New Claim Nos. in the Instant Application
08/448,979 (05634.0207)	2	109
	7-25	110-128
	3-5	129-131
	26-27	132-133
	6	134
	28	135

D

Correspondingly, the above listed Application Serial No(s). have been abandoned and/or the claims corresponding to these applications(s) have been cancelled. Applicants request that presently added claims 109-135 be examined along with presently pending claims 2-108.
